EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science

Expected May 2026

CGPA: 8.63 / 10

Relevant Coursework: Data Structures & Algorithms, Database Systems, Operating Systems, Computer Networks

TECHNICAL SKILLS

Programming: C++ , JavaScript, Python

Frontend: React.js, Tailwind CSS, Redux Toolkit, Framer Motion

Backend: Node.js, Express.js, RESTful APIs, Redis, MongoDB, MySQL

AI & Cloud: Google Gemini AI, AWS (S3, EC2), Docker, Terraform, CI/CD

Architecture: High-Level Design (HLD), Low-Level Design (LLD), Microservices

Testing & Tools: Postman, Judge0, Git, Linux

TECHNICAL EXPERIENCE & PROJECTS

Naruto: Custom Interpreted Programming Language [GitHub]

Feb 2026 – Present

Tech Stack: C++ , OOP, STL, Lexer, Parser, AST, Visitor Pattern

- Developed and deployed an interactive online playground enabling users to write, execute, and test Naruto programs directly in the browser.
- Architected a 4-stage C++ compiler pipeline (Lexer, Parser, Type Checking, AST Interpreter) parsing **80+ rules**.
- Engineered a type system for **9 data types** and arrays with a seamless **Implicit Type Promotion Engine**.
- Implemented the **Visitor Pattern** to decouple the AST from execution logic, increasing modularity across **2,500+ LOC**.
- Built robust control flow structures (loops, switch-case, recursion), handling complex algorithms seamlessly.
- Optimized nested **Environment Stacks** for memory management, ensuring **100% type safety** and runtime efficiency.

CareerByte – Full-Stack Developer Preparation Platform [GitHub]

Sep 2025 – Nov 2025

Tech Stack: React.js (Vite), Node.js, Express.js, MongoDB, Redis, Gemini AI, AWS S3, Judge0 (EC2), Docker

- Developed a MERN stack career platform with Redux Toolkit for end-to-end interview prep and recruitment workflows.
- Leveraged **Google Gemini AI** to engineer an **AI-driven** resume analyzer for interactive feedback (**100+ data points**).
- Integrated **Judge0** on **Docker/AWS EC2** for a secure, real-time code execution playground with **99.9% uptime**.
- Engineered secure **OAuth** with **JWT** authentication, for seamless session management for users.
- Scaled backend with **Node.js**, **MongoDB**, **Redis** (**40% lower latency**), and **AWS S3** for rapid resume storage.

Full-Stack Job Board Platform [GitHub]

Jan 2025 – Mar 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Tailwind CSS

- Built a full-stack recruitment portal (**MERN stack**) for end-to-end job lifecycle tracking for recruiters and applicants.
- Refactored **Express.js** routes and **MongoDB** indexing strategies, reducing API response latency by **30%**.
- Secured backend architecture with strict RBAC and **JWT authentication**, ensuring **100% candidate data privacy**.
- **Streamlined** media processing pipelines via **Cloudinary SDK**, accelerating resume parsing speed by **25%**.

ACHIEVEMENTS

- **Finalist, Tata Elxsi Teliport:** Selected among top 22 teams nationally for engineering an innovative technical solution.
- **Winner, MERN Stack Hackathon (VIT Bhopal):** Secured 1st place for rapidly prototyping a scalable web application.
- **Data Structures & Algorithms:** Solved **500+ DSA problems** on platforms including LeetCode and GeeksforGeeks.
- **Design Co-Lead, ELA:** Directed visual design for 10+ campus events, driving a **25% increase** in student engagement.
